HAPPY PLANTS

it's
so easy
 to make
 your business
grow!

30 days
 Without
 watering or
 fertilizing your plants

www.happy-plants.com

It is ideal for the care of all indoor and outdoor plants in offices, hotels, banks...

**long absences,
holidays, etc.**

Slow Liberation Of Water And Nutrients

HAPPY PLANTS is 96,15% water and nutrients in a gel form that gradually turns into water when in contact with the natural microbiological activity of the soil. is water and nutrients in a gel form that slowly turns into liquid when placed in contact with the soil. The water which is gradually released is 100% ready to be absorbed by the roots of the plant. Intelligent and rational use of water is one of the most important challenges in modern gardening and **HAPPY PLANTS** is the intelligent solution.

Placed on top of the root zone of the plant provides it with water and nutrients in an efficient way for up to 30 days, independently of temperature or moisture.

HAPPY PLANTS releases water and nutrients in a constant way. It is suitable for city gardening in zones without a water source or difficult water supplying. For flowerpots, city islands, central reservations, etc. which in most cases must be watered manually as it is impossible to apply automatic watering, **for long absences or holidays.**

It is easy to apply and can be used in new plantings or in zones already planted.

HAPPY PLANTS delivers water and nutrients for up to 30 days.

HAPPY PLANTS is an innovative watering system in:

- Keep indoor and outdoor potted plants in good moist conditions.
- Can be used as habitual or additional watering system.

You can use **Happy Plants** **all the year** and you do not need to worry to water and fertilize your plants.

HAPPY PLANTS introduces a **NEW CONCEPT** to water and fertilize the plants

Reduces frequent watering

HAPPY PLANTS is **100% natural**, biodegradable and supplies the plant with all the water and nutrients in an economic, efficient and reliable way.

HAPPY PLANTS is the correct way to water plants, bushes and ornamental trees, for places where the irrigation system causes problems or traffic restrictions and for places where supplying water is expensive or difficult.

- **City flowerpot stands and traffic islands:** **HAPPY PLANTS** guarantees you a constant supply of water and nutrients avoiding expensive hand watering with a water wagon and/or a hosepipe where access is made difficult by traffic in urban cities.
- **Banks and areas without water:** suitable for trees and bushes which without **HAPPY PLANTS** would not be supplied with water.
- **Indoor flowerpots:** **HAPPY PLANTS** releases water and nutrients slowly in indoor gardens and in all types of flowerpots and plants.
